

Lesson 4 Integrate Action Groups

1. Project Outcome

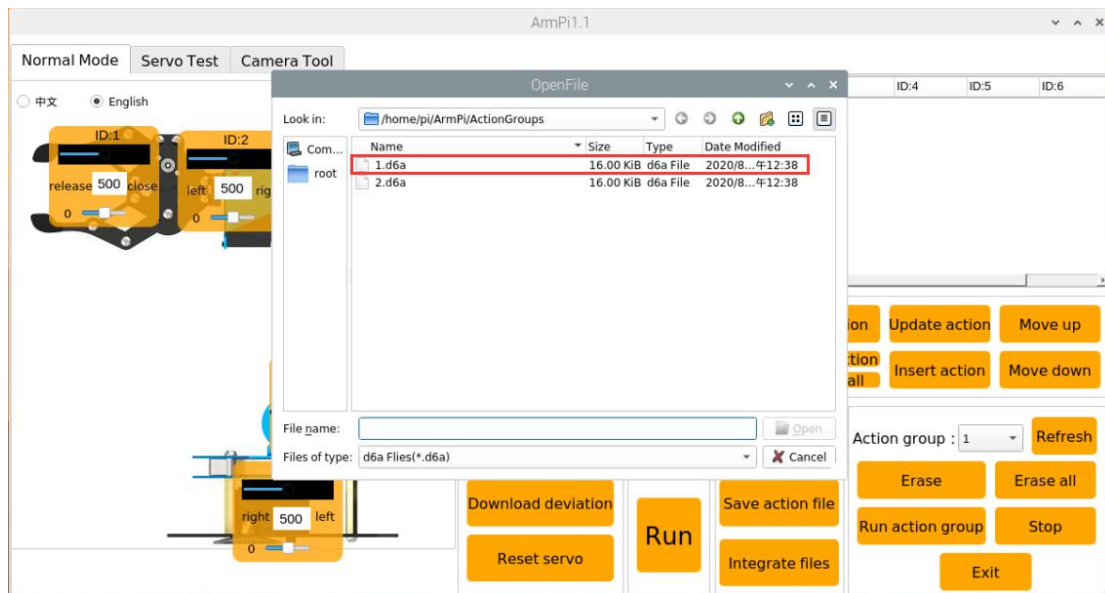

Integrate the provided basic actions to become a new action group.

2. Complete Program

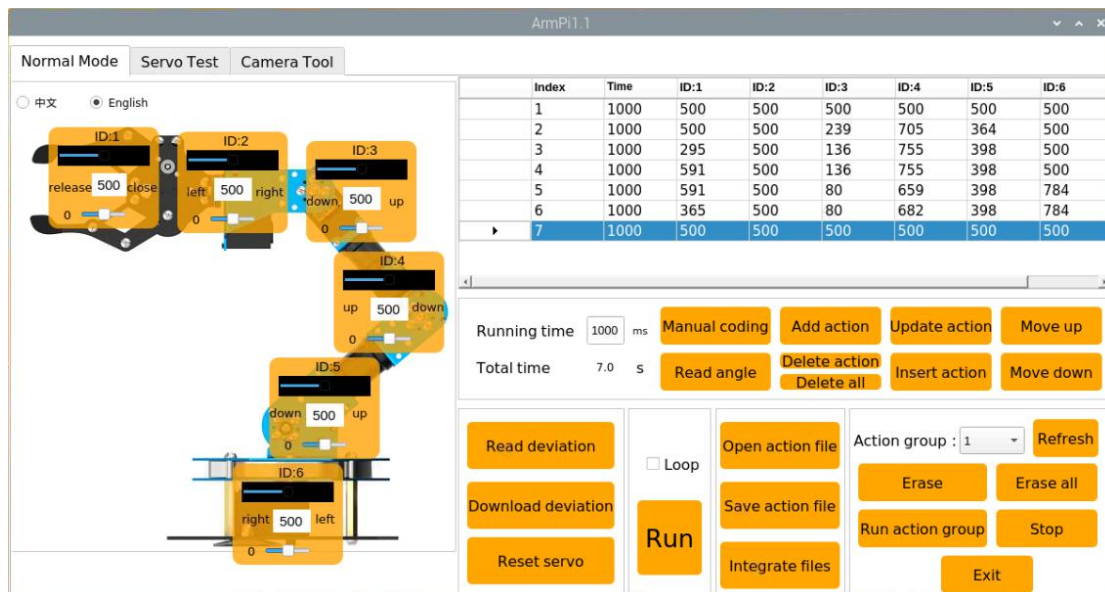

Step 1: Connect VNC and open ArmPi PC software

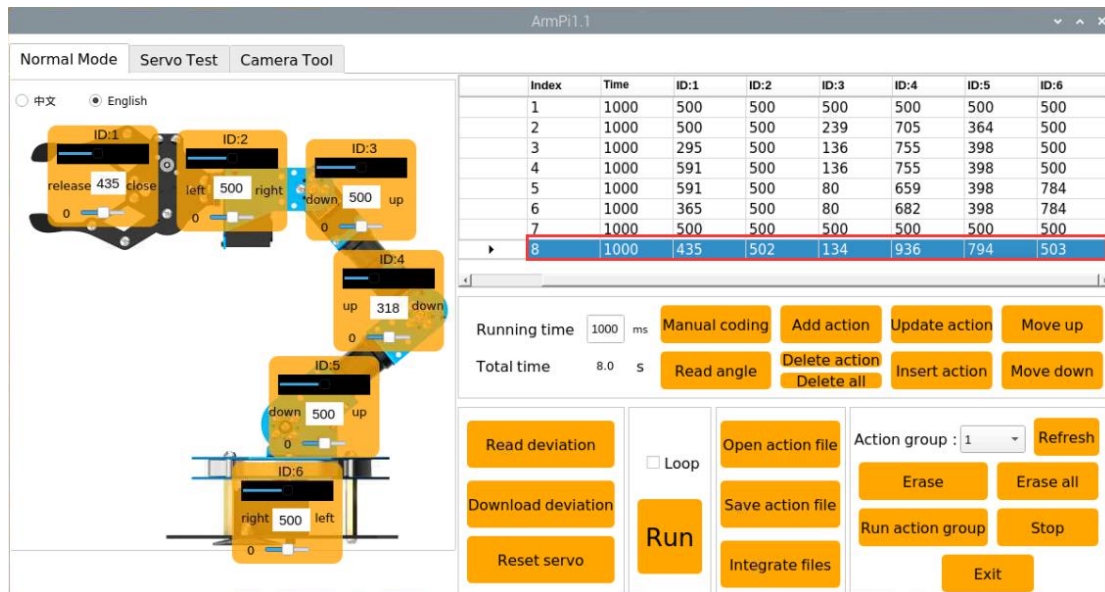

Step 2: Click “Integrate file”, choose and double click “1.d6a” to open.

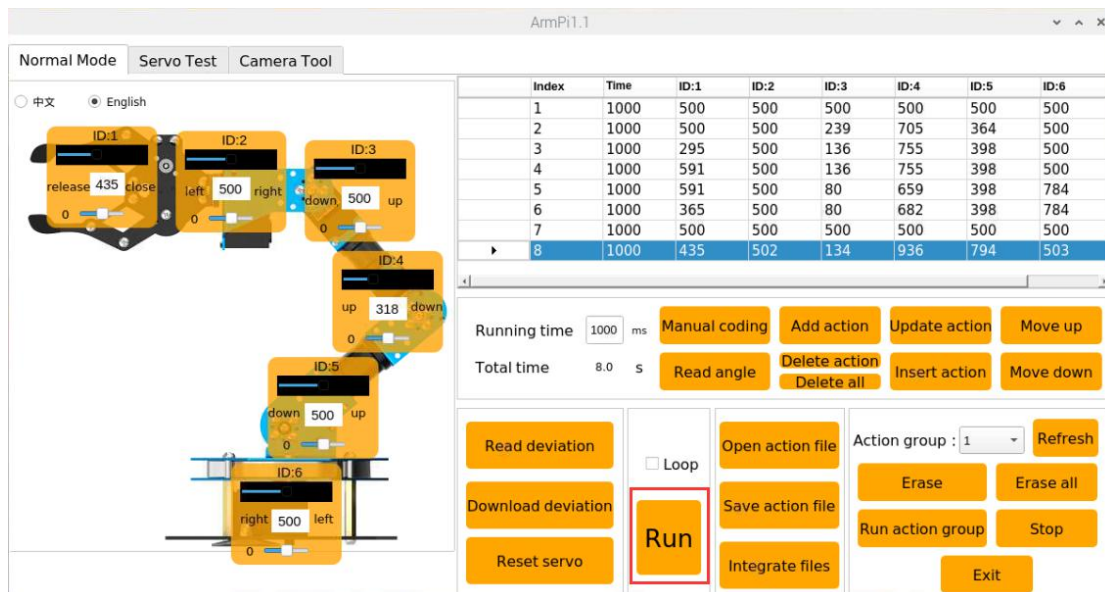

Step 3: Then the action list displays the data of No.1 action group.

Step 4: Click "Integrate file" again, choose "2.d6a" and double click to select it.

Step 5: Click “Run” to execute the new integrated actions online.

Step 6: Click “Save action file” to save the new integrated action group for the future debugging.
