

Lesson 4 Buzzer Control

1. Preparation

There is a buzzer on the Raspberry Pi expansion board, as shown in the figure below:

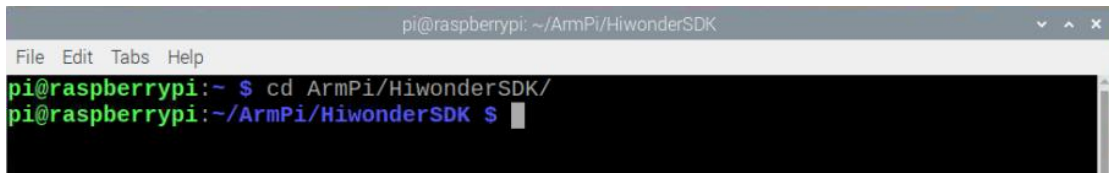

2. Have a Try

1) Click the icon shown below to enter the LX terminal command line

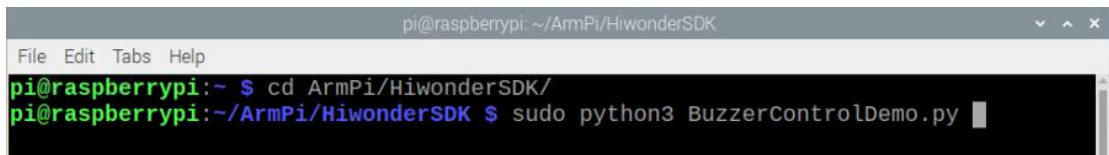

2) In the opened interface, first enter the command "cd ArmPi/HiwonderSDK/" and press Enter to switch to the directory where the routine is located.

A terminal window titled 'pi@raspberrypi: ~/ArmPi/HiwonderSDK' with a menu bar 'File Edit Tabs Help'. The prompt is 'pi@raspberrypi:~ \$'. The first command is 'cd ArmPi/HiwonderSDK/' and the second is 'sudo python3 BuzzerControlDemo.py', both shown in green text. The cursor is at the end of the second command.

```
pi@raspberrypi:~ $ cd ArmPi/HiwonderSDK/  
pi@raspberrypi:~/ArmPi/HiwonderSDK $
```

- 1) Input command to control buzzer "sudo python3 sudo python3 BuzzerControlDemo.py" and press "Enter" key

A terminal window titled 'pi@raspberrypi: ~/ArmPi/HiwonderSDK' with a menu bar 'File Edit Tabs Help'. The prompt is 'pi@raspberrypi:~ \$'. The first command is 'cd ArmPi/HiwonderSDK/' and the second is 'sudo python3 BuzzerControlDemo.py', both shown in green text. The cursor is at the end of the second command.

```
pi@raspberrypi:~ $ cd ArmPi/HiwonderSDK/  
pi@raspberrypi:~/ArmPi/HiwonderSDK $ sudo python3 BuzzerControlDemo.py
```

- 2) Close this program, press "Ctrl+C".

3. Project Outcome

After the program starts, the buzzer on the expansion board will first beep with a short beep, and then end with a long beep.
